

Administrator

```
graph TD; Admin([Administrator]) --- SeedBankPlatform[Seed Bank Platform (Admin Use Cases)]; subgraph SeedBankPlatform; Register((Register / promote models)); ManageUsers((Manage users and roles)); end; Admin --- Register; Admin --- ManageUsers;
```

This diagram illustrates the administrative use cases for the Seed Bank Platform. An external actor, the Administrator, is connected to two use cases within the system boundary: 'Register / promote models' and 'Manage users and roles'.

Seed Bank Platform (Admin Use Cases)

Register / promote models

Manage users and roles
